Side Projects

codeCampus Academy
http://codecampus.com
Architected and implemented the entirety of the teaching platform's website.

Riverside.io Co-working
http://riverside.io
Founding member of Riverside's first co-working space. Integral in shaping the early tech community there.

Dotenv
https://github.com/motdotla/dotenv
Developed and maintain NodeJS library for loading environment variables from a .env file.

Handshake.js
http://github.com/handshakejs
Passwordless authentication framework. Handshakejs makes it easy to authenticate your users using email only. Spoke at multiple conferences/meetups on it.

2013 CES Hackathon
http://www.mot.la/ces-hackathon.html
Took 2nd place at the International CES Hackathon in Las Vegas.

Profile

I am a product minded engineer with a talent for shipping and a personality that works well with others. I most enjoy the creative process of engineering and turning an idea into a product.

Endeavors

Senior Engineer, Bitium.com - May 2016 - Present

http://bitium.com Implemented efficient refactor of core components of Bitium's software. Proved myself as key member of the team within first month. Promoted to team lead.

Lead Software Engineer, Rebelmail.com - November 2014 - May 2016

http://rebelmail.com Led and directed development for Rebelmail's platform supporting its interactive emails. Managed a team of three, wrote much of the code powering the platform.

Developer Evangelist, SendGrid.com - July 2013 - November 2014

http://sendgrid.com Traveled the US and parts of the world repping SendGrid's API. Part engineering, part marketing, and part public relations.

Consultant/Developer, Oakley.com - February 2013 - April 2013

http://oakley.com Led development for three significant 'move the financial needle' projects at Oakley - a product recommendations engine, metric system, and CMS.

Consultant/Developer, Fifty and Fifty - April 2012 - February 2013

http://fiftyandfifty.org Led development on Fifty and Fifty's biggest projects - World Vision Acts, Donate.ly, and Kony2012. Technologies include Redis, Postgres, and API architecture.

Developer, Ministry Centered Technologies - November 2009 - April 2011

http://planningcenteronline.com Employed as #2 developer under the founding developer. Ministry Centered builds planning software. Technologies include Ruby, Rails, and MySQL.

Education

Pepperdine University, Malibu, CA - Bachelors of Science in International Business, 2006
Pilot's License, Hemet, CA - Earned Pilot License April of 2008
